DATA MAPPING

First name	givenName	These fields are optional. You can choose to pre-fill
	Update local On creation -	some Moodle user fields with information from the
	Update external	LDAP fields that you specify here.
	Never -	If you leave these fields blank, then nothing will be
	Lock value	transferred from LDAP and Moodle defaults will be used
		instead.
-		
Surname	sn	In either case, the user will be able to edit all of these
	Update local On creation -	fields after they log in.
	Update external	Undate local: If eachied the field will be undated (from
	Never 👻	opulate local: If enabled, the field will be updated (from
	Lock value	external adult) every unle the user logs in or there is a
	Unlocked if empty 👻	user synchronization. Fields set to update locally should
Email address		De locked.
Email address		Lock value: If enabled, will prevent Moodle users and
	Update local On creation -	admins from editing the field directly. Use this option if
	Update external	you are maintaining this data in the external auth
	Never -	system
	Lock value	system.
	Unlocked if empty 👻	Update external: If enabled, the external auth will be

list of users

CN — Common Name	CN=Guy Thomas. Actually, this LDAP attribute is made up from givenName joined to SN.
description	What you see in Active Directory Users and Computers. Not to be confused with displayName on the Users property sheet.
displayName	<pre>displayName = Guy Thomas. If you script this property, be sure you understand which field you are configuring. DisplayName can be confused with CN or description.</pre>

DN — also distinguishedName	DN is simply the most important LDAP attribute. CN=Jay Jamieson, OU= Newport,DC=cp,DC=com
givenName	Firstname also called Christian name
homeDrive	Home Folder : connect. Tricky to configure
name	name = Guy Thomas. Exactly the same as CN.
objectCategory	Defines the Active Directory Schema category. For example, objectClass = Person
objectClass	objectClass = User. Also used for Computer, organizationalUnit, even container. Important top level container.
physicalDeliveryOfficeName	Office! on the user's General property sheet
profilePath	Roaming profile path: connect. Trick to set up
sAMAccountName	sAMAccountName = guyt. Old NT 4.0 logon name, must be unique in the domain. Can be confused with CN.
SN	SN = Thomas. This would be referred to as last name or surname.
userAccountControl	Used to disable an account. A value of 514 disables the account, while 512 makes the account ready for logon.

userPrincipalName	userPrincipalName =
	guyt@CP.com Often
	abbreviated to UPN, and looks
	like an email address. Very
	useful for logging on
	especially in a large
	Forest. Note UPN must be
	unique in the forest.
